Falak Home Systems - Business Travel Policy

Falak Home Systems is a fictional company invented for this demo. This text is released under CC BY 4.0.

Booking

All business trips must be approved by the line manager before any booking is made. Flights and hotels are booked through the company travel desk at least 14 days before departure, except for urgent customer visits approved by a director.

Flights

Employees fly economy class on all flights. Directors may fly business class on flights longer than six hours. Upgrades paid with personal loyalty points are allowed. Checked baggage for equipment and samples is paid by the company.

Hotels

The hotel limit is 45 KWD per night inside the GCC and 70 KWD per night elsewhere. Employees who stay with friends or family instead of a hotel receive a flat allowance of 10 KWD per night.

Daily allowance

A daily allowance (per diem) of 25 KWD covers meals and local transport on travel days. No receipts are needed for the daily allowance. Meals that are already provided by a conference or a customer reduce the allowance by 8 KWD each.

Visas, insurance and vaccinations

Visa fees, travel insurance and vaccinations required for the destination are paid by the company. Every traveller is covered by the company travel insurance, which includes emergency medical treatment up to 50,000 KWD.

After the trip

Travel expenses must be submitted through the expense app within 30 days of returning, following the same rules as other business expenses. Unused cash advances are returned to finance within five working days of the employee's return.
